

Up in the air

If you're looking for an interesting and unique way of helping your students to learn about science and the environment 'Up In The Air' may be the answer.

East Midlands Airport and South Derbyshire Environmental Education Partnership have produced an exciting education resource pack. Targeted at key stage two, the pack links environmental and science education to Airport activities and is based on the Airport site.

The resource pack takes the form of a 'loan box' which includes all the equipment and activity cards needed for teachers to run a 'self lead' education day, as well as activities that can be done pre and post visiting the Airport. The topics covered in the pack include;

-  **Sound**
-  **Trees & Landscape**
-  **Flight**
-  **Weather**
-  **Creatures**

and involve a number of fun and interactive activities designed to challenge and stimulate.

Up in the Air is based on the Airport's perimeter trail, near the Aeropark. This area offers wonderful views of the runway and access to a range of habitats.

If you are interested in participating in Up in the Air please contact **community@eastmidlandsairport.com** or **01332 852801** to book.

A £30 deposit is required, refundable on return of all equipment in good condition. It is advised that you collect the equipment and activity cards in advance of your visit so you can plan which topics/activities you would like to do on the day.
